

MAXVALUE 20 ENDOWMENT PLAN

Matthew and Jessica, 40 and 36 years old respectively, are planning for their retirement using part of their savings to apply in long term product, long enough to generate decent returns.

They subscribe MaxValue 20 Endowment Plan for themselves respectively, building up enough savings to last them from the moment they retire, as good 'back-up' to not worry about suffering huge losses when facing a devastating stock market crash.

THIS PLAN OFFERS THEM:

Guaranteed Minimum Accumulation Benefit (GMAB) increases when the index goes up and the performance on each policy monthiversary is locked-in. This GMAB is the amount to be received as maturity benefit.

Upside potential through well diversified portfolio of investments in the international equity and bond markets.

Surrender Flexibility to manage unexpected events. Surrender benefit is the maximum of: (a) Account Value x Exit Value Adjustment; and (b) Guaranteed Minimum Surrender Benefit (GMSB). Exit Value Adjustment follows the prevailing market conditions. Partial surrender benefit is Partial Surrender % multiply by the maximum of: (a) Account Value x Exit Value Adjustment; and (b) GMSB.

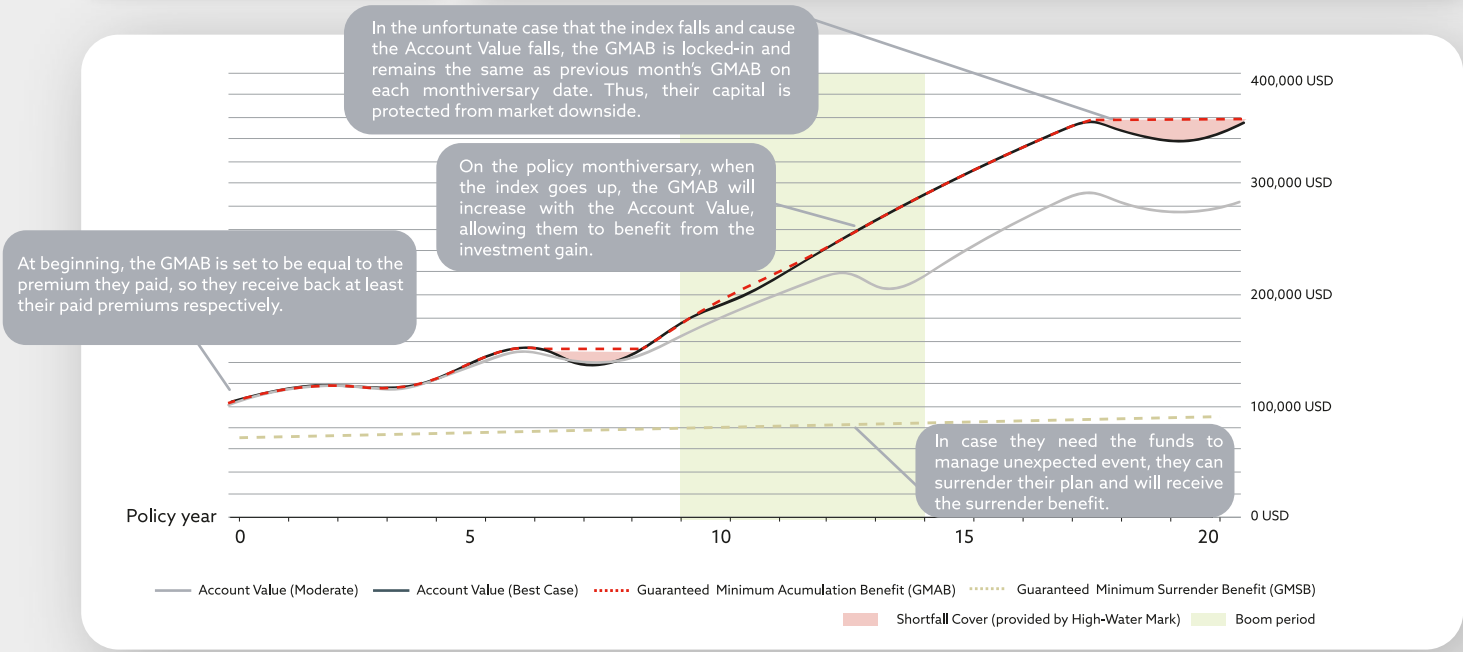

Initial premium (USD)
100,000

Performance Simulation (at maturity)

280,509 USD
Maturity Benefit

257,277 USD
Account Value

5.29%
Average Annual Return

When the policy matures, each of them will be receiving the maturity benefit from **MaxValue 20** Endowment Plan and can still enjoy their retirement life with a peace of mind.
